TECHNICAL DOCUMENTATION

Technical Reference

A precise, lookup-style reference for developer portals, APIs and CLIs.

INTENDED USERS

Integrators, External Developers

TYPICAL USE CASE

Developer portals, API & CLI references

About this template

A Technical Reference is not read cover to cover; it is searched. Every entry follows the same structure (name, syntax, parameters, return values, examples, errors), so developers can find an answer in seconds.

Detail	
Intended users	Integrators, External Developers
Typical use case	Developer portals, API & CLI references

How to use it

- Replace every *[grey bracketed placeholder]* with your own details.
- Delete the orange **Guidance** boxes and green **Example** boxes before you publish or circulate it.
- Add or remove table rows as needed; keep the section order so readers can find things quickly.
